

Einstein Jefferson Psychiatry Grand Rounds Series (July 2025-June 2026) The Science of Gut Feelings: Intuition in Psychiatry

This weekly presentation occurs from October to June and will provide education to MDs, psychologists, medical student, nurses, and other mental health providers.

The content covers a wide spectrum of topics designed to support the practicing psychiatrist and mental health provider. Topics include pharmacology, anatomy, physiology, communication, individual and group psychotherapy techniques, and system issues.

These presentations emphasize skills in working with diverse populations.

Objectives

- 1 Define and differentiate intuition from related processes such as unconscious pattern recognition, clinical judgment, and bias in psychiatric practice.
- 2 Describe the neurobiological and psychological mechanisms underlying intuitive decision-making, including the roles of the amygdala, insula, and implicit memory.
- 3 Evaluate the benefits and limitations of intuition in psychiatry, and identify strategies to integrate intuitive insights with evidence-based clinical reasoning

JOINTLY ACCREDITED PROVIDER™
INTERPROFESSIONAL CONTINUING EDUCATION

In support of improving patient care, Thomas Jefferson University is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team.
