

The Jefferson Decision Counseling Guide (JDCG) Training Program for Lung Cancer Screening prepares learners to conduct quality shared decision making conversations about lung cancer screening through a structured discussion. The program includes three lessons:

- Lesson 1: Introduction to Shared Decision Making and Decision Counseling
- Lesson 2: The Decision Counseling Process for Lung Cancer Screening
- Lesson 3: Conducting a Decision Counseling Session Using the Jefferson Decision Counseling Guide

After completing all three lessons, each learner should be able to define the importance of decision making and shared decision making in the context of healthcare, explain the major steps that are outlined in the JDCG, and conduct a decision counseling session using the JDCG. The training program will take about 45 minutes to 1 hour to complete.
